## ABOUT ME

Results-driven Frontend Developer with 1+ years of hands-on experience building scalable, responsive SaaS platforms using React.js, JavaScript (ES6+), HTML5, CSS3, and REST APIs. Proven success shipping production-grade dashboards, helpdesk systems, and ERP customizations for international clients, delivering up to 30% faster load times and a 40% reduction in development cycles through reusable, component-based architecture and performance optimization.

## EXPERIENCE

Nov 2024 - Present

### Web Developer Trainee / Outrise Technologies Pvt Ltd

Delivering scalable SaaS product interfaces and ERP customizations for international clients across frontend and full-stack integrations.

- Engineered responsive, production-grade UIs for two SaaS platforms (BackupFlex, RaiseATicket) using React.js, JavaScript (ES6+), and Bootstrap, serving 1,000+ end users across web and mobile.
- Architected a reusable React component library of 25+ modules, cutting feature development time by ~40% and improving code maintainability across teams.
- Optimized rendering and asset delivery, reducing initial page load times by ~30% and lifting Lighthouse performance scores above 90.
- Integrated 20+ REST APIs to power real-time dashboards, ticket workflows, and authentication flows across pre-login and post-login environments.
- Customized Odoo 18 ERP modules (HR, Employee, Sales) and automated workflows via server actions, reducing manual operations by ~25%.
- Resolved 50+ production tickets and collaborated with backend and QA teams to ship zero-downtime releases.

2025

### BackupFlex - SaaS Dashboard / React.js, REST APIs, Bootstrap

Scalable backup-management SaaS with secure authentication and a data-rich product dashboard.

- Built a role-based login system and interactive dashboard in React.js, enabling secure access for 500+ business users.
- Implemented reusable UI components for plan management, billing, and backup configuration, reducing duplicate code by ~35%.

2025

### RaiseATicket - Helpdesk Platform / PHP, HTML, Responsive Design

Modular SaaS helpdesk focused on real-time ticket workflows and cross-device usability.

- Delivered a modular ticket-management UI in PHP, streamlining agent workflows and improving resolution turnaround.
- Enhanced mobile UX with fully responsive layouts, improving mobile engagement by an estimated 25%.
